COPY 1 OF 2

November 11, 1955

Gentlemen:

In addition to the Type A-9 Continuous Processor and the Type A-10A Roll Film Dryer there is required for the precision control of roll film processing a control unit for maintaining chemical solution temperatures.

A suitable unit is not available on the commercial market. We, therefore, request that the following item be provided and installed at

25X1

1 each Control - Temperature Photo Chemical Solution

PAKO Type B-1 Spec. MIL-C-4256  
AF Stock No. 8900-179125

Very truly yours,

25X1
